

## ASUS Supplier Code of Conduct

The Asus Supplier Code of Conduct is based on the Responsible Business Alliance Code of Conduct and incorporates the protection provisions for Women Workers in SA8000 and for Child Labor and Forced Labor in PAS 7000.

The provisions of this Code are derived from and respect internationally recognized standards including:

- OECD Guidelines for Multinational Enterprises
- UN Guiding Principles on Business and Human Rights
- ILO Declaration on Fundamental Principles and Rights at Work
- ILO Fundamental Conventions
- UN Universal Declaration of Human Rights

The Code is made up of five sections:

- Sections A, B, and C: Standards for Labor, Health and Safety, and the Environment, respectively.
- Section D: Standards relating to business ethics.
- Section E: Elements of an acceptable system to manage conformity to this Code.

### A. Labor

Participants shall respect internationally recognized human rights, including within the supply chain context. Participants commit to uphold the human rights of workers, and to treat them with dignity and respect as understood by the international community. This applies to all workers including temporary, migrant, student, contract, direct employees, and any other type of worker.

#### A.1 Prohibition of Forced Labor

Forced labor in any form, including but not limited to, bonded (including debt bondage) or indentured labor, involuntary or exploitative prison labor, slavery or trafficking of persons is not permitted. This includes transporting, harboring, recruiting, transferring, or receiving persons by means of threat, force, coercion, abduction or fraud for labor or services. There shall be no unreasonable restrictions on workers' freedom of movement in the facility in addition to unreasonable restrictions on entering or exiting company- provided facilities including, if applicable, workers' dormitories or living quarters. All work shall be voluntary, and workers shall be free to leave work at any time or terminate their employment without penalty if reasonable notice is given, which shall be clearly stated in workers' contracts. Participants shall maintain documentation on all leaving workers. Employers, agents, and sub-agents' may not hold or otherwise destroy, conceal, or confiscate identity or immigration documents, such as government-issued identification, passports, or work permits. Notwithstanding the foregoing, employers

can only hold documentation if necessary to comply with the local law. In this case, at no time shall workers be denied access to their documents. Workers shall not be required to pay employers' agents or sub-agents' recruitment fees or other related fees for their employment. If any such fees are found to have been paid by workers, such fees shall be repaid to the worker.

### **A.2 Young Workers**

Child labor shall not be used in any stage of manufacturing. The term "child" refers to any person under the age of 15, or under the age for completing compulsory education, or under the minimum age for employment in the country, whichever is greatest. Workers under the age of 18 (Young Workers) shall not perform work that is likely to jeopardize their health or safety, including night shifts and overtime.

Participants shall ensure proper management of student workers through proper maintenance of student records, rigorous due diligence of educational partners, and protection of students' rights in accordance with applicable laws and regulations. Participants shall implement an appropriate mechanism to verify the age of workers. The use of legitimate workplace learning programs, which comply with all laws and regulations, is supported. Participants shall provide appropriate support and training to all student workers. In the absence of local law, the wage rate for student workers, interns, and apprentices shall be at least the same wage rate as other entry-level workers performing equal or similar tasks. If child labor is identified, assistance/remediation shall be provided.

### **A.3 Working Hours**

Working hours shall not exceed the maximum set by local law. Further, a workweek shall not be more than 60 hours per week, including overtime, except in emergency or unusual situations. All overtime shall be voluntary. Workers shall be allowed at least one day off every seven days.

### **A.4 Wages and Benefits**

Compensation paid to workers, at a minimum, shall comply with all applicable wage laws, including those relating to minimum wages, overtime hours and legally mandated benefits. Participants shall recognize the importance of all workers to earn a living wage by measuring and documenting any gaps. All workers shall receive equal pay for equal work and qualification. Workers shall be compensated for overtime at pay rates greater than regular hourly rates. Deductions from wages as a disciplinary measure shall not be permitted. For each pay period, workers shall be provided with a timely and understandable wage statement that includes sufficient information to verify accurate compensation for work performed. All use of temporary, dispatch and outsourced labor shall be within the limits of the local law.

### **A.5 Prevention and Mitigation of Precarious Employment**

As part of the hiring process, all workers shall be provided with a written employment agreement in their native language, or in a language the worker can understand, that contains a description of terms and conditions of employment.

Foreign migrant workers shall receive the employment agreement prior to the worker departing from his or her country of origin and there shall be no substitution or change(s) allowed in the employment agreement upon arrival in the receiving country unless these changes are made to meet local law and provide equal or better terms. Participants shall not use employment agreements in a way designed to cause social or economic insecurity to the workers, such as: abusing consecutive short-term contracts, labor-only contracting, subcontracting, and/or homeworking arrangements.

#### **A.6 Non-Discrimination/Non-Harassment/Humane Treatment**

Participants shall commit to a workplace free of harassment and unlawful discrimination. There shall be no harsh or inhumane treatment including violence, gender-based violence, sexual harassment, sexual abuse, corporal punishment, mental or physical coercion, bullying, public shaming, or verbal abuse of workers; nor is there to be the threat of any such treatment. Companies shall not engage in discrimination or harassment based on race, color, age, gender, sexual orientation, gender identity or expression, ethnicity or national origin, disability, pregnancy, religion, political affiliation, union membership, covered veteran status, protected genetic information, marital status, or family responsibilities in hiring and employment practices such as wages, promotions, rewards, and access to training. Disciplinary policies and procedures in support of these requirements shall be clearly defined and communicated to workers. Workers shall be provided with reasonable accommodation for religious practices, disability and family responsibilities (such as working caregivers). In addition, workers or potential workers should not be subjected to medical tests, including pregnancy or virginity tests, or physical exams that could be used in a discriminatory way. This was drafted in consideration of ILO Discrimination (Employment and Occupation) Convention (No.111).

#### **A.7 Freedom of Association and Collective Bargaining**

Open communication and direct engagement between workers and management are the most effective ways to resolve workplace and compensation issues. Workers and/or their representatives shall be able to openly communicate and share ideas and concerns with management regarding working conditions and management practices without fear of discrimination, reprisal, intimidation, or harassment. In alignment with these principles, participants shall respect the right of all workers to form and join trade unions of their own choosing, to bargain collectively, and to engage in peaceful assembly as well as respect the right of workers to refrain from such activities. Where the right of freedom of association and collective bargaining is restricted by applicable laws and regulations, workers shall be allowed to elect and join alternate lawful forms of worker representations.

### **B. HEALTH AND SAFETY**

Participants recognize that in addition to minimizing the incidence of work-related

injuries and illnesses, a safe and healthy working environment enhances the quality of products and services, consistency of production and worker retention and morale. Participants also recognize that ongoing worker participation and training are essential to the continuous improvement of occupational health and safety in the workplace.

### **B.1 Occupational Health and Safety**

Worker potential for exposure to health and safety hazards (chemical, electrical and other energy sources, fire, vehicles, and fall hazards, etc.) shall be identified and assessed, mitigated using the Hierarchy of Controls. Where hazards cannot be adequately controlled by these means, workers shall be provided with appropriate, well-maintained, personal protective equipment, and educational materials about risks to them associated with these hazards. Gender-responsive measures shall be taken, such as not having pregnant women and nursing mothers in working conditions, which could be hazardous to them or their child and to provide reasonable accommodations for nursing mothers.

### **B.2 Emergency Preparedness**

Potential emergency situations and events caused by human manipulation, accidents, natural disasters shall be identified and assessed, and their impact minimized by implementing emergency plans and response procedures including emergency reporting, employee notification and evacuation procedures, worker training, and drills. Emergency drills shall be executed at least annually or as required by local law, whichever is more stringent. Emergency plans shall also include appropriate fire detection and suppression equipment, clear and unobstructed egress, emergency treatment for wind, flood, lightning, electric shock, adequate exit facilities, contact information for emergency responders, and recovery plans. Such plans and procedures shall focus on minimizing harm to life, the environment, and property.

### **B.3 Occupational Injury and Illness**

Procedures and systems are to be in place to prevent, manage, track and report occupational injuries and illnesses, including provisions to encourage worker reporting, classify and record injury and illness cases, provide necessary medical treatment, investigate cases and implement corrective actions to eliminate their causes, and facilitate the return of workers to work. Participants shall allow workers to remove themselves from imminent harm, and not return until the situation is mitigated, without fear of retaliation.

### **B.4 Industrial Hygiene**

Worker exposure to chemical, biological, and physical agents shall be identified, evaluated, and controlled according to the Hierarchy of Controls. When hazards cannot be adequately controlled, workers shall be provided with and use appropriate, well-maintained, personal protective equipment free of charge. Participants shall provide workers with safe and healthy working environments,

which shall be maintained through ongoing, systematic monitoring of workers' health and working environments. Participants shall provide occupational health monitoring to routinely evaluate if workers' health is being harmed from occupational exposures. Protective occupational health programs shall be ongoing and include educational materials about the risks associated with exposure to workplace hazards.

### **B.5 Physically Demanding Work**

Worker exposure to the hazards of physically demanding tasks, including manual material handling and heavy or repetitive lifting, prolonged standing, and highly repetitive or forceful assembly tasks shall be identified, evaluated, and controlled.

### **B.6 Machine Safeguarding**

Production and other machinery shall be evaluated for safety hazards. Physical guards, interlocks, and barriers shall be provided and properly maintained where machinery presents an injury hazard to workers.

### **B.7 Sanitation, Food, and Housing**

Workers shall be provided with ready access to clean toilet facilities, potable water and sanitary food preparation, storage, and eating facilities. Worker dormitories provided by the Participant or a labor agent shall be maintained to be clean and safe, and provided with appropriate emergency egress, hot water for bathing and showering, adequate lighting, and adequate conditioned ventilation, individually secured accommodations for storing personal and valuable items, and reasonable personal space along with reasonable entry and exit privileges.

### **B.8 Health and Safety Communication**

Participants shall provide workers with appropriate workplace health and safety information and training in the language of the worker or in a language the worker can understand for all identified workplace hazards that workers are exposed to, including but not limited to mechanical, electrical, chemical, fire, and physical hazards. Health and safety related information shall be clearly posted in the facility or placed in a location identifiable and accessible by workers. Health information and training shall include content on specific risks to relevant demographics, such as gender and age, if applicable. Training shall be provided to all workers prior to the beginning of work and regularly thereafter. Workers shall be encouraged to raise any health and safety concerns without retaliation.

## **C. ENVIRONMENT**

Participants recognize that environmental responsibility is integral to producing world-class products. Participants shall identify the actual and potential environmental impacts and minimize adverse impacts on the community, environment, and natural resources within their manufacturing operations, while

safeguarding the health and safety of the community and public.

### **C.1 Environmental Permits and Reporting**

All required environmental permits (e.g., discharge monitoring), approvals, and registrations shall be obtained, maintained, and kept current, and their operational and reporting requirements shall be followed.

All Supplier shall be third-party certified to meet the requirements of ISO 14001, a nationally adopted version of ISO 14001, or the European Union Eco-Management and Audit Scheme (EMAS).

### **C.2 Pollution Prevention and Resource Conservation**

Emissions and discharges of pollutants and generation of waste shall be minimized or eliminated at the source or by practices such as adding pollution control equipment; modifying production, maintenance, and facility processes; or by other means. The use of natural resources, including water, fossil fuels, minerals, and virgin forest products, shall be conserved by practices such as modifying production, maintenance and facility processes, materials substitution, re-use, conservation, recycling, or other means. Participants shall consider localized material environmental impact caused by their operations and establish a biodiversity policy when needed.

### **C.3 Hazardous Substances**

Chemicals, waste, and other materials posing a hazard to humans or the environment shall be identified, labeled, and managed to ensure their safe handling, movement, storage, use, recycling or reuse, and disposal. Hazardous waste data shall be tracked and documented.

### **C.4 Solid Waste**

Participants shall implement a systematic approach to identify, manage, reduce, and responsibly dispose of or recycle solid waste (non-hazardous). Waste data shall be tracked and documented.

### **C.5 Air Emissions**

Air emissions of volatile organic chemicals, aerosols, corrosives, particulates, ozone depleting substances, and combustion byproducts generated from operations shall be characterized, routinely monitored, controlled, and treated as required prior to discharge. Ozone- depleting substances shall be effectively managed in accordance with the Montreal Protocol and applicable regulations. Participants shall conduct routine monitoring of the performance of its air emission control systems.

### **C.6 Materials Restrictions**

Participants shall adhere to all applicable laws, regulations, and customer requirements regarding the prohibition or restriction of specific substances in products and manufacturing, including labeling for recycling and disposal.

### **C.7 Water Management**

Participants shall implement a water management program that documents, characterizes, and monitors water sources, use and discharge; seeks opportunities to conserve water; and controls channels of contamination. All wastewater shall be characterized, monitored, controlled, and treated as required prior to discharge or disposal. Participants shall conduct routine monitoring of the performance of its wastewater treatment and containment systems to ensure optimal performance and regulatory compliance.

### **C.8 Energy Consumption and Greenhouse Gas Emissions**

Participants shall establish and report against an absolute corporate-wide greenhouse gas reduction goal. Energy consumption and all Scopes 1, 2, and significant categories of Scope 3 greenhouse gas emissions shall be tracked, documented, and publicly reported. Participants shall look for methods to improve energy efficiency and to minimize their energy consumption and greenhouse gas emissions.

ASUS required all key component supplier and assembly plant shall be third party certified to meet the requirement of ISO 50001 certification. Key components are defined below:

- A. main printed circuit board
- B. integrated circuits: central processing units (CPUs), solid state drives (SSDs), hard disk drives (HDDs), random access memory (RAM), graphic processing unit (GPUs)
- C. power supply units
- D. display panels

## **D. ETHICS**

To meet social responsibilities and to achieve success in the marketplace, Participants and their agents shall uphold the highest standards of ethics including:

### **D.1 Business Integrity**

The highest standards of integrity shall be upheld in all business interactions. Participants shall have a zero-tolerance policy to prohibit any and all forms of bribery, corruption, extortion and embezzlement.

### **D.2 No Improper Advantage**

Bribes or other means of obtaining undue or improper advantage shall not be promised, offered, authorized, given, or accepted. This prohibition covers promising, offering, authorizing, giving or accepting anything of value, either directly or indirectly through a third party, in order to obtain or retain business, direct business to any person, or otherwise gain an improper advantage. Monitoring, record keeping, and enforcement procedures shall be implemented to ensure compliance with anti-

corruption laws.

### **D.3 Disclosure of Information**

All business dealings shall be transparently performed and accurately reflected on the Participant's business books and records. Information regarding participant's labor, health and safety, environmental practices, business activities, structure, financial situation, supply chain and performance shall be disclosed in accordance with applicable regulations (to the Participant and those in their value chain) and prevailing industry practices. Falsification of records or misrepresentation of conditions or practices in the supply chain are unacceptable.

### **D.4 Intellectual Property**

Intellectual property rights shall be respected. Transfer of technology and know-how is to be done in a manner that protects intellectual property rights, and customer and supplier information shall be safeguarded.

### **D.5 Fair Business, Advertising and Competition**

Standards of fair business, advertising, and competition shall be upheld.

### **D.6 Protection of Identity and Non-Retaliation**

Programs that ensure the confidentiality, anonymity, and protection of supplier and employee whistleblowers shall be maintained, unless prohibited by law. Participants shall have a communicated process for their personnel to be able to raise any concerns without fear of retaliation.

### **D.7 Responsible Sourcing of Minerals**

Participants shall adopt a policy and exercise due diligence on the source and chain of custody of the tantalum, tin, tungsten, gold, and cobalt in the products they manufacture to reasonably assure that they are sourced in a way consistent with the Organization for Economic Co-operation and Development (OECD) Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas or an equivalent and recognized due diligence framework. Participants shall ensure suppliers have a process in place to verify smelter or refiner (SOR) conformance, and track changes in the status of SORs.

### **D.8 Privacy**

Participants shall commit to protecting the reasonable privacy expectations of personal information of everyone they do business with, including suppliers, customers, consumers, and employees. Participants shall comply with privacy and information security laws and regulatory requirements when personal information is collected, stored, processed, transmitted, and shared.

## **E. MANAGEMENT SYSTEMS**

Participants shall adopt or establish a management system appropriate to the size, nature and context of their operations, including, at a minimum (a) a commitment to respect human rights and environment; (b) a due diligence process; and (c) access to remedy for internal and external stakeholders where the participant caused, or contributed to, adverse human rights and environmental impacts, with a scope that is related to the content of this Code. It shall also facilitate continual improvement.

### **E.1 Company Commitment**

Participants shall establish human rights, health and safety, environmental and ethics policy statements affirming Participant's commitment to due diligence and continual improvement, endorsed by executive management. Policy statements shall be made public and communicated to workers in a language they understand via accessible channels.

### **E.2 Management Accountability and Responsibility**

Participants shall clearly identify senior executive and company representative(s) responsible for ensuring implementation of the management systems and associated programs. Senior management reviews the status of the management systems on a regular basis.

### **E.3 Legal and Customer Requirements**

Participants shall adopt or establish a process to identify, monitor and understand applicable laws, regulations, and customer requirements, including the requirements of this Code.

### **E.4 Risk Assessment and Risk Management**

Participants shall adopt or establish a process to identify the legal compliance, environmental, health and safety and labor practice and ethics risks, including the risks of severe human rights and environmental impacts, associated with Participant's operations. Participants shall determine the relative significance for each risk and implementation of appropriate procedural and physical controls to control the identified risks and ensure regulatory compliance.

### **E.5 Improvement Objectives**

Participants shall establish written performance objectives, targets and implementation plans to improve the Participant's social, environmental, and health and safety performance, including a periodic assessment of Participant's performance in achieving those objectives.

### **E.6 Training**

Participants shall establish programs for training managers and workers to implement Participant's policies, procedures, and improvement objectives and to meet

applicable legal and regulatory requirements.

### **E.7 Communication**

Participants shall establish process for communicating clear and accurate information about Participant’s policies, practices, expectations, and performance to workers, suppliers, and customers.

### **E.8 Worker/Stakeholder Engagement and Access to Remedy**

Participants shall establish processes for ongoing two-way communication with workers, their representatives, and other stakeholders where relevant or necessary. The process shall aim to obtain feedback on operational practices and conditions covered by this Code, and to foster continuous improvement. Participants shall establish or participate in operational-level grievance mechanisms (OGMs) aligned with the UNGPs. Workers shall be given a safe environment to provide grievance and feedback without fear of reprisal or retaliation. Participants shall also provide information on alternative dispute resolution mechanisms.

### **E.9 Audits and Assessments**

Participants shall conduct periodic self-evaluations to ensure conformity to legal and regulatory requirements, the content of the Code, and customer contractual requirements related to social and environmental responsibility.

All suppliers shall ensure compliance with the SA8000 standard and RBA code of conduct requirements and obtain SA8000 certification or RBA VAP when required by ASUS.

### **E.10 Corrective Action Process**

Participants shall establish a process for timely correction of deficiencies identified by internal or external assessments, inspections, investigations, and reviews.

### **E.11 Documentation and Records**

Participants shall create and maintain documents and records to ensure regulatory compliance and conformity to company requirements along with appropriate confidentiality to protect privacy.

### **E.12 Supplier Responsibility**

Participants shall establish a process to communicate Code requirements to suppliers and to monitor supplier compliance.
